

## CLASS ACTIVITY: Symbiosis is a Spectrum

Arrange the following species on the symbiosis axes according to their relationship with humans. Note that some of these species may not fit neatly into each category! Are there any types of pairwise interactions discussed in class that are not represented here? Can you think of different species that might be good examples?

**Don't forget: Make sure everyone in your group writes their name on the bottom of this page before turning it in!**

Grey Wolf

HIV

Apple Tree

Tuna

*E. coli*

White Shark

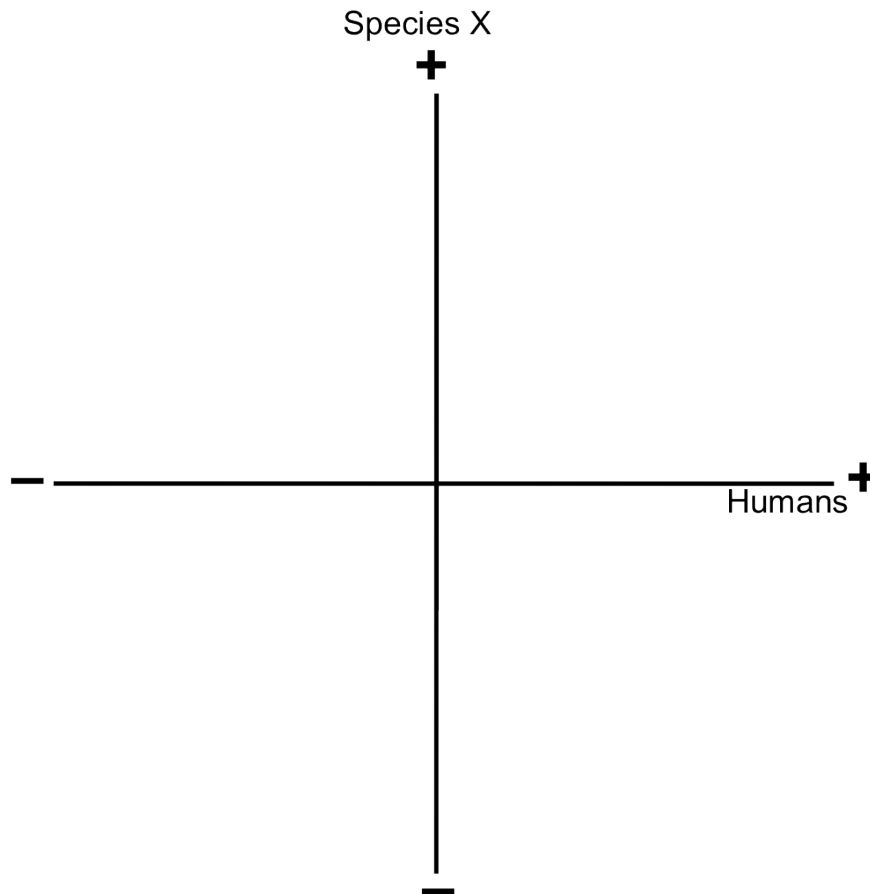

Pigeon

White-tailed Deer

Emperor Penguin

Missing interaction types and suggested examples:
